

# What to GROW when

|                   | January | February | March | April | May | June | July | August | September | October | November | December |
|-------------------|---------|----------|-------|-------|-----|------|------|--------|-----------|---------|----------|----------|
| Artichoke (Globe) |         |          |       |       |     |      |      |        |           |         |          |          |
| Aubergine*        |         |          |       |       |     |      |      |        |           |         |          |          |
| Beetroot          |         |          |       |       |     |      |      |        |           |         |          |          |
| Beans (Broad)     |         |          |       |       |     |      |      |        |           |         |          |          |
| Beans (French)    |         |          |       |       |     |      |      |        |           |         |          |          |
| Beans (runner)    |         |          |       |       |     |      |      |        |           |         |          |          |
| Brussels Sprouts  |         |          |       |       |     |      |      |        |           |         |          |          |
| Butternut Squash  |         |          |       |       |     |      |      |        |           |         |          |          |
| Cabbage (Savoy)   |         |          |       |       |     |      |      |        |           |         |          |          |
| Carrots           |         |          |       |       |     |      |      |        |           |         |          |          |
| Cauliflower       |         |          |       |       |     |      |      |        |           |         |          |          |
| Chard             |         |          |       |       |     |      |      |        |           |         |          |          |
| Chillies*         |         |          |       |       |     |      |      |        |           |         |          |          |
| Courgette         |         |          |       |       |     |      |      |        |           |         |          |          |
| Cucumber*         |         |          |       |       |     |      |      |        |           |         |          |          |
| Kale              |         |          |       |       |     |      |      |        |           |         |          |          |
| Leeks             |         |          |       |       |     |      |      |        |           |         |          |          |
| Lettuce           |         |          |       |       |     |      |      |        |           |         |          |          |
| Onions (spring)   |         |          |       |       |     |      |      |        |           |         |          |          |
| Peas              |         |          |       |       |     |      |      |        |           |         |          |          |
| Pepper*           |         |          |       |       |     |      |      |        |           |         |          |          |
| Potatoes          |         |          |       |       |     |      |      |        |           |         |          |          |
| Pumpkin           |         |          |       |       |     |      |      |        |           |         |          |          |
| Spinach (summer)  |         |          |       |       |     |      |      |        |           |         |          |          |
| Sweetcorn         |         |          |       |       |     |      |      |        |           |         |          |          |
| Tomatoes*         |         |          |       |       |     |      |      |        |           |         |          |          |

Sow Indoors
  Sow Outdoors
  Plant Out
  Harvest
 \* Best grown in a greenhouse or sunny spot indoors

A rough guide to when and where to plant veg/salad from seed. Some variations may apply, so always check your seed packets!
